Black Wordings

#### How to use the wireless transmitter (2 steps):

First, plug the USB transmitter into a computer USB port.

Second, turn on the power switch on the back of the headset. When the headset has sound, it enters the normal working state

This product is environmentally friendly and energy-saving. Wireless working distance: 10 meters (unless there is interference around, which may shorten the distance.)

#### Precautions:

Keep away from strong interference sources, such as microwaves and strong magnetic fields

After prolonged use, clean or wipe with a non-toxic cleaning product that won't damage the surface. Do not pour any liquid and do not put the USB transmitter into any container with liquid

- Advanced 2.4G wireless transmission technology, stable and efficient, a new generation of low-power technology and design concept, plug and play, take away anytime, anywhere,
- Simple and practical to meet your daily office needs

EUT Name: USB Dongle

Model No: HSEG768WL

Serial Model: N/A

Serial No.: N/A

Sample(s) Status: Engineer sample

Channel Number: 25 channels

Operation frequency: 2406MHz-2478MHz

Antenna Type: PCB antenna

Modulation Technology: GFSK

Hardware version.: N/A

Antenna gain: 0dBi

Power supply: DC 5V

Software version.: N/A

Model different: N/A

Note: For a more detailed features description, please refer to the manufacturer's specifications or the User's Manual.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures

- Reposition or reposition the receiving antenna.
- Increase the distance between the equipment and the receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

**WARNING:** Any changes or modifications to this equipment not expressly approved by the manufacturer could void your authority to operate the equipment

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

This device has been evaluated for compliance with general RF exposure requirements. The device can be used in portable exposure conditions without restriction
