RE: Inventec Appliances Corporation

FCC ID: POTCU-108R

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) It appears that the antenna is actually contained in a plastic cover. Please provide internal photographs of the antenna.
- 2) The users manual section 1, mentions a detachable antenna. Page 31 of the users manual also mentions a detachable antenna. However this product appears to only contain a single integrated antenna. Please explain and if necessary correct the users manual.
- 3) Section 1 and 2-2 of the users manual appear to describe the device as directly connecting to the computer (i.e. laptop) without the cable. This device appears to only connect to a computer via a USB cable. Please comment and correct the users manual if necessary.
- 4) FYI. Proposed Grant Conditions:

Power output listed is conducted. The antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
