

TO WHOM IT MAY CONCERN

About our product:

FCC IC: POUMTB40SUSX
IC: 11967A-MTB40SUSX

Wisycor Srl wants to apply for equipment Class TLD to show compliance with the new band restrictions and outputs power limit in the 600MHz band.

The frequencies ranges settable on the transmitter MTB40S are the follow:

470.075-607.925 Mhz
614.075-615.925 Mhz
653.075-656.925 Mhz
657.075-662.925 Mhz

The output power is selectable from 20mW to 100mW but the maximum power is limited by software for US products according to the following table:

Freq range [MHz]	Max power selectable by menu
470.075-607.925	100mW
614.075-615.925	20mW
653.075-656.925	20mW
657.075-662.925	20mW

Maximum power and allowed frequency ranges are preconfigured in factory in a part of memory of the device no modifiable by the user.

The firmware reads this configuration and allows to the user to set only a frequency belonging to the allowed frequency ranges at the maximum power according to the above table.
