Dear Application Reviewer,

This letter is to request a Class II Permissive change to the wireless terminal (SOMA Port 100 model: CPE-100-200). This product has been approved originally under the FCC ID: POZ-CPE-0140A-000.

The following changes have been made:

- 1) New antenna layout to allow the connection of an external booster antenna.
- 2) The main board layout was modified.
- 3) The shield covering the unit used to be soldered to the board continuously, along its entire perimeter. It is now soldered to the board only at the through-hole pins, which are spaced at $\frac{1}{4}$ wavelength intervals.

We, the original grantee, declare that no other changes have been made to the SOMA Port 100, other than those specified above.

The SOMA Port 100 was re-tested at Elliott Labs and found to be still in compliance to FCC Part 24 Subpart E.

Regards,

A handwritten signature in black ink, appearing to read 'Moataz Drebika'.
