RE: FCC ID: POZ-ERU-0202001

1) The 731 form says the emissions designator is 4M18FXW, page 2 of the report says the emissions designator is 4M02FXW and page 6 of the report says the emissions is 4.208Mhz. Please clarify as to what the actual emissions designator. Please provide consistent information on the emissions designator. Also, please verify FXW not F9W.

Response: Both 731 form and report has been corrected and revised. Both documents have been uploaded. FXW is correct.

2) Does the output power vary with loading?

Response: The output power at the ERU will vary. The ERU will adjust itself for best possible pick-up signal, so the ERU will either be at maximum output power or minimum output power.

Hopefully this answers all of your questions. Please contact me via doc@elliottlabs.com if you require more information.

Regards,
