RE: FCC ID: POZNPWCS003353A

Attention: Juan Martinez

I have a few comments on this Application.

1. The internal photos in the file Internal RFSS Module Photos.pdf are unreadable. Please provide clear photos.
2. The drawing of the label is not clear and it does not contain the FCC ID number. Please provide a readable label with the correct FCC ID number.
3. The operational description (theory of operation) is typically a short description of how the device works. You have provided 6 files containing many hundreds of pages, much of what is more adequately defined as user manual information. Can you please provide a shorter description of how the main transmitting device operates? This will make the application process much quicker.
4. I did not find any information in the installation guide about rf exposure, safe distances, or FCC regulatory. Please explain.
5. Please explain your radiated emissions limit calculations in the table on page 32. Perhaps I have miscalculated, but I do not get the same numbers.

A handwritten signature in black ink that reads "Dennis Ward". The signature is fluid and cursive, with "Dennis" on the top line and "Ward" on the bottom line.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
