The task of light – electronic translating and data collection was completed in ADNS 2030IC.

Then the data would be transferred to CPU CMA6226.

The function of MA6226 include the following items:

- 1.DC/DC steady voltage circuit
- 2.Encode left, middle, right button and encoder
- 3.Deal with data and encode it
- 4.RF local oscillator data
- 5.FSK modulate and RF power export
- 6.Low battery test
- 7.Low battery indicator
