

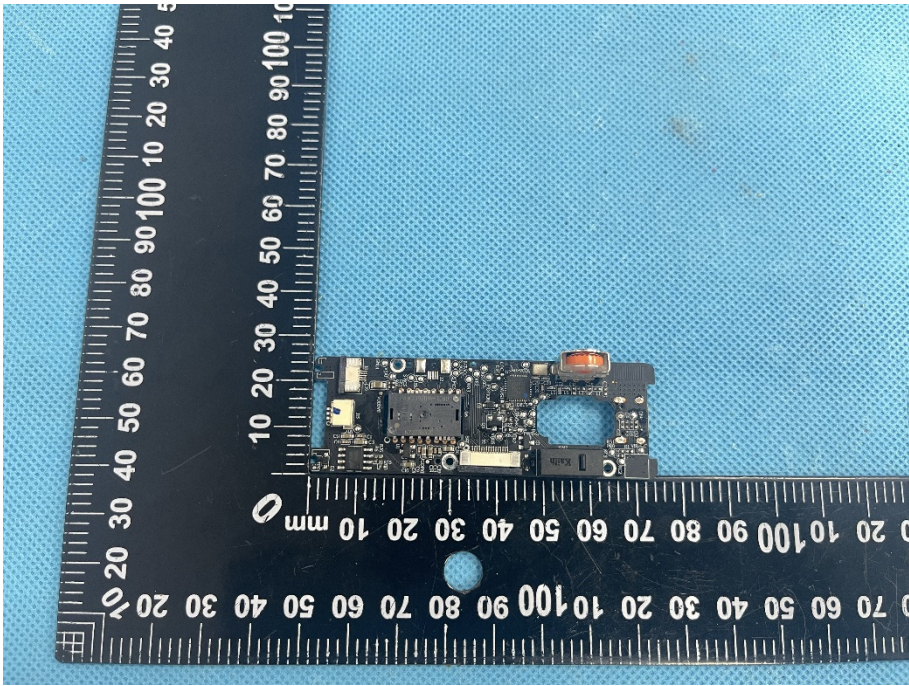

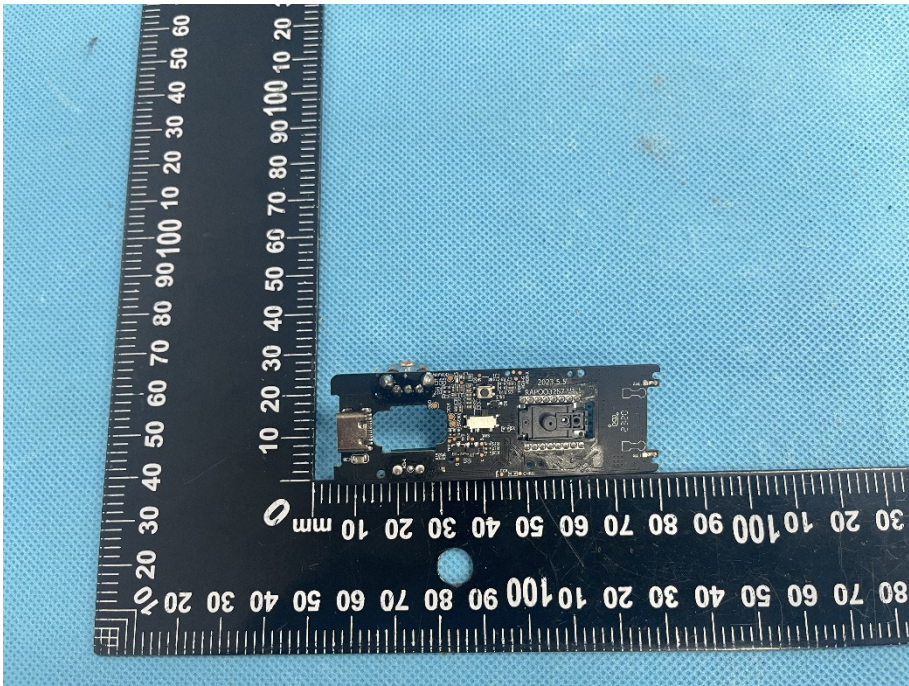

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

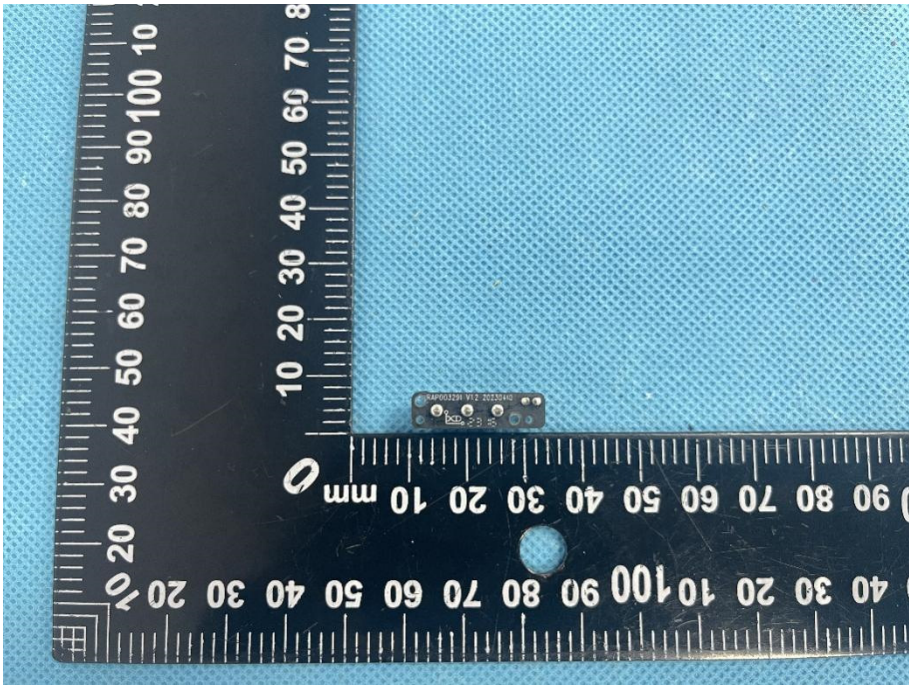

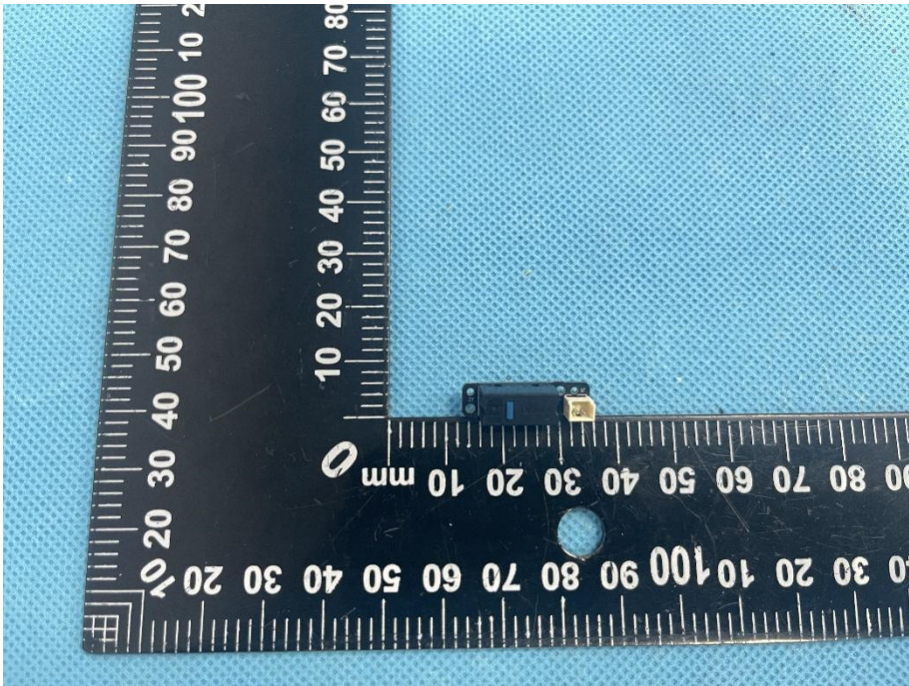

EUT Housing and Board View 1

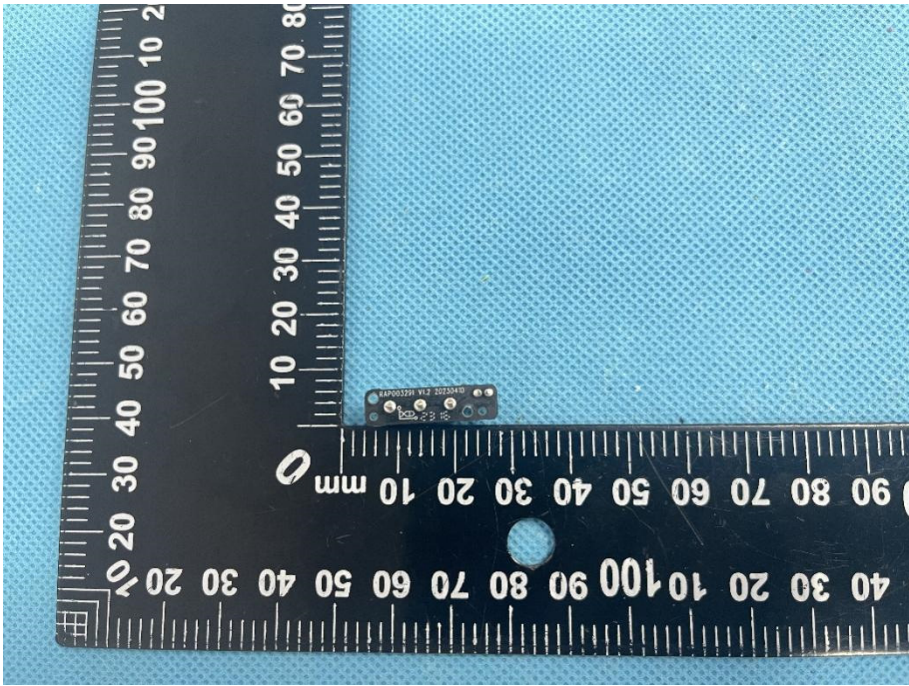

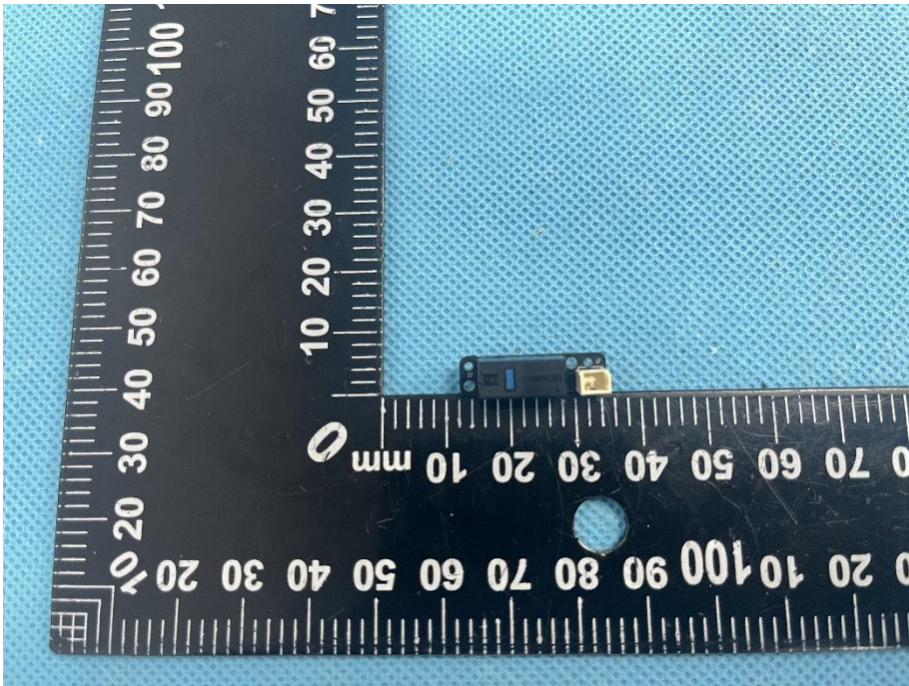

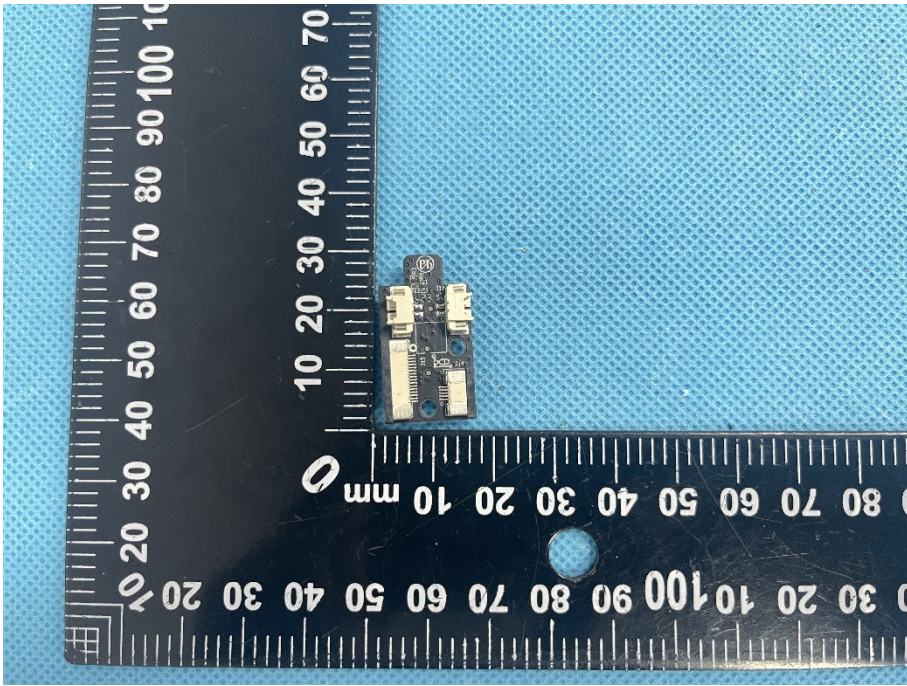

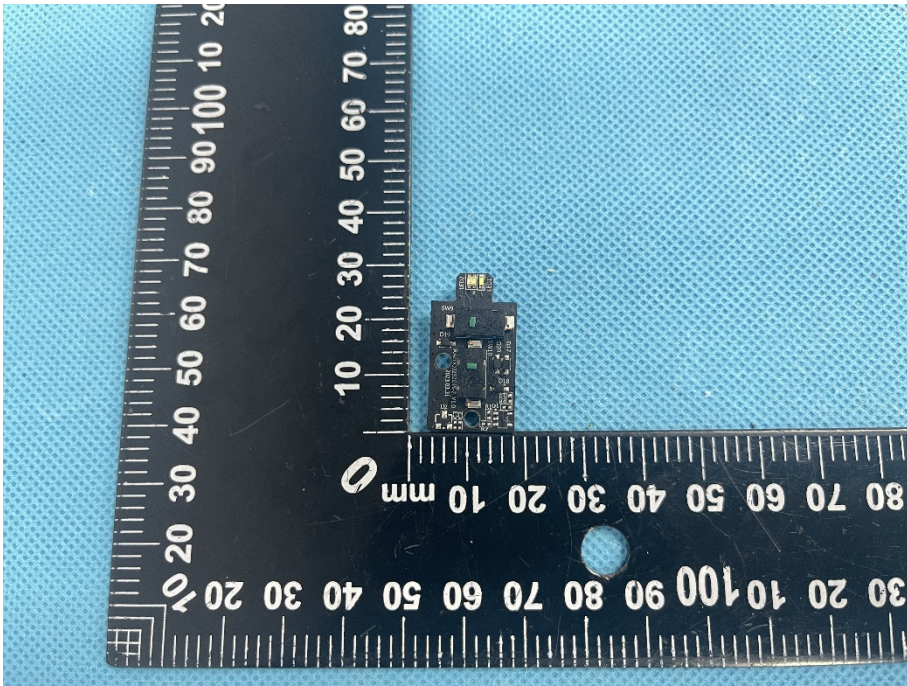

EUT Housing and Board View 2

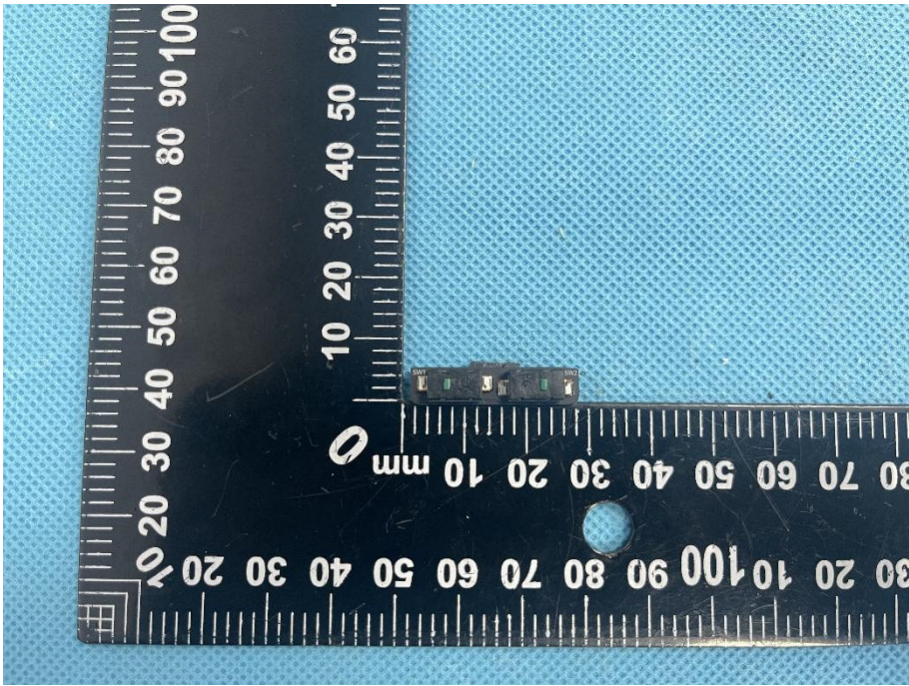

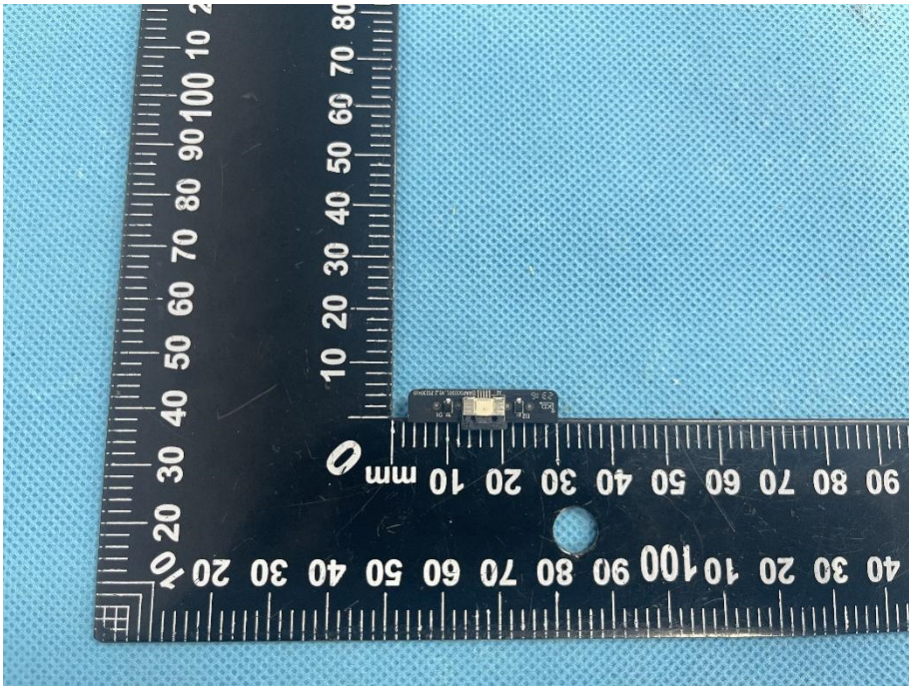

<p>Solder Board-Component View 1</p>	 A photograph of a small, rectangular printed circuit board (PCB) component. The board is dark green and populated with various electronic components, including a central integrated circuit, several resistors, and a prominent orange cylindrical component. The board is placed on a blue textured surface. A black L-shaped ruler is positioned around the component for scale, with markings in millimeters. The ruler shows the component is approximately 25mm wide and 15mm high.
<p>Solder Board-Component View 2</p>	 A photograph of the same PCB component from a different perspective. This view shows the underside of the board, revealing the solder joints and the reverse side of the components. The board is again placed on a blue textured surface with a black L-shaped ruler for scale. The ruler indicates the component's dimensions are consistent with View 1.

<p>Solder Board-Component View 3</p>	 A photograph showing a small, dark, rectangular component on a blue textured surface. The component is positioned between two black L-shaped rulers. The vertical ruler on the left has markings from 0 to 100 mm. The horizontal ruler at the bottom has markings from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler. The component has several small, circular features on its top surface.
<p>Solder Board-Component View 4</p>	 A photograph showing the same small, dark, rectangular component from a different perspective. It is placed on the same blue textured surface between the same two black L-shaped rulers. The component is now oriented vertically, with its longer side aligned with the vertical ruler. It is positioned at approximately the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler. The component's top surface shows a different set of features, including a small, rectangular gold-colored pad.

<p>Solder Board-Component View 5</p>	
<p>Solder Board-Component View 6</p>	

<p>Solder Board-Component View 7</p>	 A photograph of a small, rectangular solder board component. The component is dark in color and has several gold-colored pins or connectors on its left side. It is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings and numbers, with the vertical scale showing 0 to 100 and the horizontal scale showing 0 to 100. The component is positioned between the 20 and 30 mm marks on the vertical scale and between the 20 and 30 mm marks on the horizontal scale.
<p>Solder Board-Component View 8</p>	 A photograph of the same solder board component from a different perspective. The component is dark and has several gold-colored pins or connectors on its right side. It is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings and numbers, with the vertical scale showing 0 to 100 and the horizontal scale showing 0 to 100. The component is positioned between the 20 and 30 mm marks on the vertical scale and between the 20 and 30 mm marks on the horizontal scale.

<p>Solder Board-Component View 9</p>	 A photograph of a small, rectangular solder board component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The ruler has white markings in millimeters. The component is located between the 10mm and 20mm marks on the horizontal ruler and between the 10mm and 20mm marks on the vertical ruler. The component has a dark green or black body with several small, light-colored rectangular features on its top surface.
<p>Solder Board-Component View 10</p>	 A photograph of the same solder board component as in View 9, but from a different perspective. The component is positioned on the same blue textured surface. A black L-shaped ruler is placed next to it for scale. The component is located between the 10mm and 20mm marks on the horizontal ruler and between the 10mm and 20mm marks on the vertical ruler. The component has a dark green or black body with several small, light-colored rectangular features on its top surface.
