In re : Hyundai Curitel Inc.  
FCC ID : PP4DX-20B  
Dual Mode Cellular PHONE(AMPS/CDMA)  
Part 22 Certification  
Request for Confidentiality

Gentlemen :

In accordance with 0.459 of CFR 47, Hyundai Curitel Inc. hereby requests confidentiality of the Block Diagrams attachment, Schematic Diagrams attachment, Operational Description attachment, and Part List/Tune-Up Procedure attachment for the above-referenced Certification application.

These documents contain detailed system and equipment description and related information about the product which Hyundai Curitel Inc. considers to be proprietary, confidential, and a custom design and, otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, Hyundai Curitel Inc. feels this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give our competitors an unfair advantage in the market.

Sincerely Yours,

---

**SUBJECT : Hyundai Curitel Inc.  
FCC ID : PP4DX-30B  
DUAL-BAND PHONE (AMPS/CDMA)  
Part 22 - Certification  
FCC E911 Requirements Per § 22.921**

Gentlemen :

Hyundai Curitel Inc. hereby certifies that the dual mode cellular phone(FCC ID : PP4DX-20B, using the Automatic A/B Roaming - Inteligent Retry Method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a "9-1-1" call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely Yours,

---

AFFIDAVIT FOR ESN PROTECTION  
OF CELLULAR MOBILE TELEPHONES

We hereby certify that the Handheld Portable Cellular Phone (FCC ID : PP4DX-20B) is so designed that it complies with all the requirements for ESN protection specified in Section 22.919 of the FCC Rules.

- a) The transmitter in service has a unique ESN.
- b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely Yours,

Kisoo Kim - Part Leader  
EMC Part of Int'l Standard Certification Team
