Turn Bluetooth on and off

By default Bluetooth is turned off. If you turn it on, and then turn off your device, Bluetooth also turns off. When you turn on your device again, Bluetooth turns on automatically.

1. On the main screen, click **Menu** > **Customize** > **Bluetooth**.

2. If　Select Turn Bluetooth on when the Bluetooth is power off　then　the Bluetooth is power on.

Create a Bluetooth partnership

Ensure that the two devices are within close range and that both Bluetooth-enabled devices are discoverable.

1. On the main screen, click **menu** > **Customize** > **Bluetooth** >**Turn Bluetooth on**.

2-1. If you want to find headset Bluetooth or handsfree Bluetooth, then Click **Add Device** > **Headset**. Your phone searches for other Bluetooth-enabled headset-devices and handsfree-devices displays them in the list.

2-2. If you want to find other Bluetooth Devices, then Click **Add Device** > **Devices**. Your phone searches for other Bluetooth-enabled devices and devices displays them in the list.

3. Select the device with which you want to create a Bluetooth partnership, and click **Pair**.

4. In **Pinkey**, if you want to use a passkey (recommended for enhanced security), enter a alphanumeric passkey between 1 and 16 characters, and click **Done**. Otherwise, leave the passkey blank, and click **OK**.

5. Enter the same passkey on the other device.

6. Paired the device move to **Trusted Devices** folder. If paired Bluetooth device is other Bluetooth Device then Select the device with which you want to create a Bluetooth partnership, and click Connect.

Tip

Once you create a partnership, the Bluetooth-enabled devices don't need to be discoverable to beam information between them; Bluetooth needs only to be turned on.

Note

If the headset becomes disconnected, turn the headset on and repeat steps 1-6 above.

End a Bluetooth partnership

1. On the main screen, click **Menu** > **Customize** > **Bluetooth** > **Trusted Devices**

2**.** select the Bluetooth device you want to end Click **Disconnect**.

Note

  If Select the Bluetooth partnership you want to delete then Click **Trusted Devices** > select the Bluetooth devices you want to delete **Menu** > **Delete**.

Make your device discoverable

To receive beamed information, beaming devices or computers must be able to detect your device.

1. On the main screen, click **Menu** > **Customize** > **Bluetooth** .

2. Click **menu** > **Discoverable**

3**.** select the Discoverable mode you want to choose.

Other Bluetooth-enabled devices can now detect your phone and attempt to beam information to it, establish a Bluetooth partnership, or use a Bluetooth service.

Notes

Rename a Bluetooth partnership

You can give a more meaningful name to a Bluetooth partnership to help you recognize it when selecting from a list of partnerships.

1. On the Home screen, click **Menu** > **Customize** > **Bluetooth**.

2. Select the Bluetooth partnership to rename.

3. Click **Menu** > **Rename**.

4. In **Device Name**, enter a new name for the Bluetooth partnership, and click **Save**.

Note

If the headset becomes disconnected, turn the headset on and repeat steps 1-4 above.

Delete a Bluetooth partnership

You can delete paired Bluetooth device you want to delete.

1. On the Home screen, click **Menu** > **Customize** > **Bluetooth > Trusted Devices.**

2. move the Bluetooth device you want to delete click **Menu** > **Delete**
