>> Dear Ki Soo Kim,

>>

>> I have reviewed the above referenced TCB application and find that the following items are  
needed before the review can be completed:

>>

>> 1. Please submit a user's manual exhibit (not submitted with the application), which should  
contain all required information for FCC compliance (Pt. 15 and Pt. 22, RF Exposure).

>>

>> 2. This device appears to be a CDMA2000 1x device (using the MSM6000 chipset), however  
there is no documentation about the CDMA2000 operations. Please provide detailed technical  
information in the Operational Description exhibit about the RC's and SO's for which this device is  
capable of. Please provide further information about the means of controlling the handset to go into  
those modes and what was done to determine the worst case modes. Does this handset operate  
with the wider bandwidth signals (wider than 1.25Mhz channels)?

>>

>> 3. Please provide a Letter of Authorization exhibit using the newer CCS format from Hyundai  
Curitel to HCT for this application.

>>

>> The items indicated above must be submitted before processing can continue on the above  
referenced application. Failure to provide the requested information within 30 days of the original  
e- mail date may result in application dismissal and forfeiture of the filing fee. Also, please note  
that partial responses increase processing time and should not be submitted. Any questions about  
the content of this correspondence should be directed to the e- mail address listed below the name  
of the sender.

>>

>> Best regards,

>> Chris Harvey
