Re: Class II Permissive Change for FCCID: PPD-AR5BAP-00032

October 17, 2006

Dear Examiner,

Atheros Communications, Inc. requests a Class II Permissive Change for FCCID: PPD-AR5BAP-00032, originally granted on 7/16/2003.

The change filed under this application is:

- Add DFS compliance and support for 5.47-5.725 GHz operation.

The certified device will not be capable of 40MHz channel operation outside of the grant conditions. The device is configured via factory programmed EEPROM settings to limit operation to 20MHz channels in the 5.25-5.35 and 5.47-5.725 GHz DFS Bands. These settings cannot be accessed or changed by the end user.

Sincerely,

Michael Green / Manager, Global Product Compliance
Atheros Communications Inc.
