RF Exposure Information - Addendum

Re: FCC ID PPD-AR5BCB-00013
Applicant: Atheros Communications, Inc.

The application for the above device included a SAR report. This SAR report details results for a phantom-to-EUT separation of 1cm. While the profile of most laptops will ensure this separation distance, under certain circumstances it may be possible that the end user could come closer than 1cm to the device. For this reason, the following warning statement will be placed in a prominent location in the User's Manual:

Warning

To comply with the FCC's rf exposure requirements you must maintain a distance of at least 1cm from the antenna of this device while it is in use.
