

The Letter of Declaration

The given device of this application is the client-only slave device without radar detection capability. This device is capable of controlling the selection channel and transmitting the signal only if Master Device sending the activation-signal. While Master Device (AP) detects the presence of Radar Beacon, the signal emits from Master Device will be terminated, and Slave Device will no longer communicate with Master Device by neither transmitting nor receiving. Therefore, We, Test Lab, determine regardless of lower gain of antenna this Wifi Card intends to connect, the relevant DFS tests shall continue to be complied, because the controllability is lied upon Master Device (AP)

Applicant: Atheros Communications, Inc.

FCC IDENTIFIER: PPD-AR5BHB92

The Product Name of Radio Equipment: 802.11n 2x2 PCIe Minicard
