Subject: ATHEROS COMMUNICATIONS, INC., FCC ID: PPD-AR5BXB63, Assessment NO.: AN09T9270, Notice#1

Hi Claire,

Please address following issues.

Q#1: Per the antenna location diagram, additional 3G and BT modules are included in this laptop PC but there are no information mentioned if they will be included in this C2PC filing.

Ans.: Regarding the BT and WWAN modules incorporated in this laptop were all certified as a module and WWAN module has filed as C2PC to address co-location issue with Atheros FCC ID: PPD-AR5BXB63 and BT module. So please this application will only apply to WLAN portion.

Q#2: Please provide host user manual.

Ans.: As attached.

Q#3: Please provide host label format and ensure that all available RF transmitters' FCC IDs are contained.

Ans.: As attached.

Q#4: Per KDB 178919 D01 Permissive Change Policy v04r02, when a Class II permissive change is filed for either EMC or

RF exposure (RFE) purposes, an EMC test report or RFE evaluation is required, regardless of whether EMC or the RFE levels have degraded. Therefore, please provide the EMC test report or a technical justification letter to demonstrate that EMC test is still complied.

Ans.: [Justification letter is attached.](#)

Best Regards,
Lucy

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
