**Overall Assessment Letter for 802.11b/g Module AR5BXB63
FCC id: PPD-AR5BXB63**

I have reviewed this Class 2 Permissive change and find it compliant.

This is an application to permit installation of this module in a portable host Laptop which includes a BT module.

The Operational description provides antenna location information and antenna-to-antenna separation distances. The BT antenna is more than 20cm from the WLAN antenna and has an output power that is below the threshold (60/f(GHz)). The filing under FCC ID SMFP81006N which covers the laptop and BT transmitter, provide further information.

I underwent the FCC RF exposure training with the FCC in October 2008.

Yours sincerely
