

Attestation Letter

FCC ID: PPD-QCA9008-TBD1

Subject: Qualcomm discussion with FCC KDB on Assessment Approach and Compliance Conclusion

To whom it may concern:

This Class II permissive change has been submitted after completion of direct communication between Qualcomm and the FCC OET Laboratory via a KDB exchange. Through KDB correspondence and meetings, the millimeter wave assessment approach, both simulation and measurement, have been discussed and it was confirmed that the information presented through the KDB discussion was adequate to demonstrate compliance for the host product with RF exposure requirements at 60 GHz. The RF exposure report and appendixes submitted in this application consolidate the reviewed information into a final compliance report. Portions of the KDB discussion are also included in the application as a confidential attachment.

Best regards
