

Subject: Request for Confidentiality

FCC ID: PPD-QCA9008-TBD1

To Whom It May Concern:

Pursuant to the provisions of Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), we are requesting the Commission to withhold the following attachments as confidential document from public disclosure indefinitely.

- RF Exposure Report Appendix A
- FCC KDB Response 4-21-16

The above mentioned documents contain detailed system and equipment description are considered as proprietary information in operation of the equipment. The public disclosure of above documents might be harmful to our company and would give competitor an unfair advantage in the market.

In additional to above mentioned documents, pursuant to Public Notice DA 04-1705 of the Commission's policy, in order to comply with the marketing regulations in 47 CFR §2.803 and the importation rules in 47 CFR §2.1204, while ensuring that business sensitive information remains confidential until the actual marketing of newly authorized devices. We are requesting the commission to grant short-term confidentiality request on the following attachments until 180 days from date of approval.

- Internal Photos
- External Photos
- User Manual

It is our understanding that all measurement test reports, FCC ID label format and correspondent during certification review process cannot be granted as confidential documents and those information will be available for public review once the grant of equipment authorization is issued.

Sincerely,

A handwritten signature in black ink, appearing to read 'Caroline Yu'.

Subject: Confidentiality structure

FCC ID: PPD-QCA9008-TBD1

To Whom It May Concern:

This letter is intended to document the confidentially structure of the RF exposure report.

The main report contains all information required to assess compliance with the RF exposure requirements.

The confidential "Appendix A" contains proprietary information related to the structure/PWB of the antenna, operating parameters, how the antenna operates to establish the optimum communication link having the best signal to noise ratio, and the far field antenna patterns related to the antenna configurations.

The antenna patterns are provided for reference only to the FCC per the KDB discussion and in no way are used to determine the antenna configurations for RF exposure analysis or in the actual RF exposure analysis assessment.

Sincerely,

A handwritten signature in black ink, appearing to read 'Caroline Yu'.
