RE: FCC ID: PPIRM-161\_ATCB003146

Attention: Thomas Reitmayer

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the manual (page 97 – technical specs section) states the device operates in the 824MHz cell bands. Please note that the 731 states the PCS bands only. If this device operates in the 824-848MHz range in the US then it must also be certified to part 22. Please explain.
2. FYI – no action needed. While it is OK to list the channel numbers, the actual center frequency should be listed in the data tables etc.
3. Please note that the SAR report has not been provided. Please provide that SAR report for FCC. Please include all necessary calibration data for the dipole and probe with the report.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
