

Changes in FCC ID: PPIRM-94

Following components have been changed:

N7700 PA

Version updated, specification remains same. Following changes:

- Two capacitors at the GSM900 and 1800 output matching changed. The actual value remains same. This change improves ESD behaviour. Not relevant for GSM1900.
- Adaptive metal mask change is introduced. Power ramp tilt corrected.
- The ESD protection at the Voltage mode Interface is removed.

Conclusion of internal review:

24.238a Bandedge Compliance

24.238a Radiated emissions
