RE: Lite-On Technology

FCC ID: PPQ-WN1301P

I have a few comments on this Application.

- 1.) The Internal Photographs and External Photographs are a little bit too grainy. If possible, it would be appreciated if you could provide clearer photographs.
- 2.) No Agent Authorization letter was supplied empowering Sporton to act on behalf of Lite-On. Please provide.
- 3.) The Block Diagram does not meet the requirements of 2.1033(b)(5). Please review and supply corrected Block Diagram.
- 4.) The Manual does not contain the required Information to User as specified in 15.21. Please review.
- 5.) The Radiated Emissions do not show any measured values above 2.6GHz. Are you suggesting there are no emissions of interest above 2.6GHz? Were measurements taken in all the restricted bands of 15.205?
- 6.) Was a Declaration of Conformity assessment performed on this equipment as a computer peripheral?
- 7.) FYI: Please make sure all files uploaded to AmericanTCB for submission to FCC use Adobe 5.x format. The FCC does not yet use this version of Adobe Acrobat and some files may be incompatible.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
