

RF Exposure Statement

1. Standard Applicable

According to 1.1307 (b)(1), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

2. Measurement Result:

Band I (5180~5240MHz)

This is a portable device and the max peak output power (EIRP) is 6.75dBm, which is equal to 4.73 mW, Lower that low threshold (60/f GHz) mW = 11.53 mW (f=5.2GHz), d <20 cm general population category.

Band IV (5745~5825MHz)

This is a portable device and the max peak output power (EIRP) is 7.28dBm, which is equal to 5.35 mW, Lower that low threshold (60/f GHz) mW = 10.34 mW (f=5.8GHz), d <20 cm general population category.

The SAR/MPE measurement is not necessary.
