FLIP 2.4

User Manual

1.1 Profile
Please read this pamphlet carefully in order to make your phone in perfect condition.
Our company may charge this mobile phone without prior written notice and reserves the final right to interpret the performance of this mobile phone.
Due to different software and network operators, display on your phone may be different, refer to your phone for details.

1.2 Safety Information
If your phone has lost or been stolen, notify the telecommunication office the SIM card is disabled (network support is required). This can avoid economic loss caused by unauthorized use.
Please take measures as following to avoid your phone being unauthorized use:
• Set PIN code of SIM card
• Set Phone password

1.3 Safety warning and Attentions
Safety warning
➤ **ROAD SAFETY COMES FIRST**
Donot use a hand-held phone while driving, use hands-free fittings when calls are unavoidable while driving. In some countries, dialing or receiving calls while driving is illegal!
➤ **SWITCH OFF IN AIRCRAFT**
Wireless devices can cause interference in aircraft. Using a mobile phone in flight is illegal and risky.
Please make sure that your mobile phone is powered off in flight.
➤ **SWITCH OFF BEFORE ENTERING RISKY AREAS**
Strictly observe the relevant laws, codes, and regulations on the use of mobile phones in risky areas. Turn off your mobile phone before entering a place susceptible to explosion, such as an oil station, oil tank, chemical plant or a place where a blasting process is under way.
➤ **OBSERVE ALL SPECIAL REGULATIONS**
Follow any special regulations in force in any area such as hospitals and always switch off your phone whenever it is forbidden to use it or, when it may cause interference or danger. Properly use your mobile phone near medical apparatuses, such as pacemakers, hearing aids, and some other electronic medical devices, as it may cause interference to such apparatuses.
➤ **INTERFERENCE**
The conversation quality of any mobile phone may be affected by radio interference. An antenna is built inside the mobile phone and located below the microphone. Do not touch the antenna area during a conversation, lest that the conversation quality deteriorate.
➤ **QUALIFIED SERVICE**
Only qualified personnel may install or repair phone equipment. Installing or

1

repairing the mobile phone on your own may bring great danger and violates the warranty rules.
➤ **ACCESSORIES AND BATTERIES**
Use only approved accessories and batteries.
➤ **USE SENSIBLY**
Use only in a normal and proper manner.
➤ **EMERGENCY CALLS**
Ensure the phone is switched on and in service, enter the emergency number, e.g. 112, then press the Dial key. Give your location and state your situation briefly. Do not end the call until told to do so.
Note: Just like all other mobile phones, this mobile phone does not necessarily support all the features described in this manual due to network or radio transmission problems. Some networks even do not support the emergency call service. Therefore, do not rely solely on the mobile phone for critical communications such as first aid. Please contact the local network operator.
Precautions
This mobile phone is well designed with fine art. Please exercise special care when using it. The following suggestions will help your mobile phone survive the warranty period and extend its service life:
➤ Keep the mobile phone and all its fittings beyond children's reach.
➤ Keep the mobile phone dry. Keep away from rain, moisture, liquid or other substances that may corrode electronic circuits.
➤ Do not use or store the mobile phone in dusty places, lest that active parts of the mobile phone be damaged.
➤ Do not store the mobile phone in a high-temperature place: High temperature will shorten the life of electronic circuits and damage the battery and some plastic parts.
➤ Do not store the mobile phone in a chilly place. Otherwise, moistures will be formed inside the mobile phone to damage electronic circuits when the mobile phone is moved to a constant temperature place.
➤ Do not throw, knock or shock the mobile phone, as that will destroy the internal circuits and high-precision components of the mobile phone.

1.4 Functions of Keys

FCC Warning
Specific Absorption Rate (SAR) information SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this mobile phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designed for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1.0cm from the body.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

4

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
➤ Reorient or relocate the receiving antenna.
➤ Increase the separation between the equipment and receiver.
➤ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
➤ Consult the dealer or an experienced radio/TV technician for help
