

Attestation

To Whom It May Concern:

Regarding the EX21 – test tag:

The test tag in the EX21 Exciter is set to transmit 40 messages of length 4.1 milli-seconds each, totaling 164.0 milli-seconds. The test transmission is set to poll once per hour in the system software controlling the EX21. This is not adjustable. The transmission period is 164.0 milli-seconds, once per hour, and is compliance with the silent period as stated in Part 15.231 (e):

"In addition, devices operated under the provisions of this paragraph shall be provided with a means for automatically limiting operation so that the duration of each transmission shall not be greater than one second and the silent period between transmissions shall be at least 30 times the duration of the transmission but in no case less than 10 seconds."

Sincerely

Don Ferguson
