

Parts kit Instruction

21820135

The Perkins® SmartCap works in conjunction with the Perkins® My Engine App, which can be downloaded from Google Play, and the Apple App Store.

Simply:-

- 1) Install the App
- 2) Register a user ID and log in
- 3) Add your engine to the 'My engines' section via its serial number
- 4) Enter your engines current application hours
- 5) Replace your oil filler cap with the Perkins SmartCap
- 6) Register the Perkins SmartCap, using your devices camera and the data matrix on the top of the SmartCap.

Perkins SmartCap communicates with your phone via BlueTooth, enabling you to quickly access useful parts, service and engine based data.

The Perkins MyEngine App must be active within the background of your mobile device to enable data transmission to and from the Cloud.

Further help is available within the App to assist with installation and Perkins SmartCap use.

We recommend that you confirm to receive notifications from both Perkins and third parties. This will enable your local Perkins Distributor to assist you in all your service needs.

Additional installation support can be obtained from your local Perkins Distributor, or by contacting myappsupport@perkins.com.

FCC Notice

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Industry Canada Notice to Users
