Subject: SAR Testing

Gentlemen:

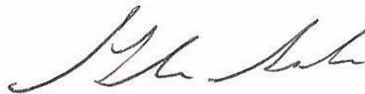

Zaxcom is submitting an application for certification for our FCC ID: PR6LA5 transmitter.

We do not feel that SAR testing is required on this transmitter and that the SAR reports for our previously certified FCC ID: PR6XRT and FCC ID: PR6LA9 (941-960 MHz band) should cover this new FCC ID.

The FCC ID PR6LA5 and FCC ID: PR6LA9 are identical to the FCC ID PR6XRT in physical packaging power output, modulation and frequency coverage. The SAR report #'s SAR.20150210 Revision B for FCC ID: PR6XRT and SAR.20190106 for FCC ID: PR6LA9 will be applied to the FCC ID: PR6LA5 test results for FCC certification as retesting is not warranted due to no change in electrical or physical parameters that would require an updated SAR test.

Sincerely,

Glenn Sanders
