Installing the batteries

1 Take the battery cover off.
2 Insert two AAA batteries (included) into the battery compartment. Make sure that the + and - signs match the symbols in the compartment.
3 Replace the cover.

AAA batteries

Connecting your keyboard to your computer

- Plug the USB receiver into the USB port on your computer.

  The computer automatically detects the keyboard and you can immediately begin using it.

If the keyboard does not work:

- Re-plug the USB receiver into the USB port on your computer, then press **ESC+K** on the keyboard to pair. The LED indicator on the keyboard flashes steadily while in pairing mode (10 seconds). After pairing successfully, the LED turns off.
- Check the batteries in your keyboard. The LED indicator blinks for 10 seconds when the batteries are low.

LED indicators

Caps Lock

Num Lock

Function	Description
Power ON	Red LED is on for 10 seconds, then turns off.
Low battery warning	Red LED blinks for 10 seconds.
Pairing	Red LED blinks for 10 seconds after pressing **ESC+K** keys.
Paired successfully	After pressing the Connect button, the LED blinks, then lights solid for 10 seconds.
Pairing failed	After pressing the Connect button, the LED blinks for 10 seconds, then turns off.

Cleaning your keyboard

Wipe the keyboard with a damp, lint-free cloth.

Troubleshooting

My keyboard is not working.

- Make sure that your keyboard is turned on.
- Move your keyboard closer to your computer.
- Make sure that your computer meets the system requirements.
- Make sure that your keyboard and USB receiver are paired by pressing the **ESC+K** keys on the keyboard.
- Replace the keyboard batteries.
- Try connecting your USB receiver into a different USB port on your computer.
- Try removing or moving other wireless devices away from the computer to prevent interference.
