1) Upload an MPE exhibit. Include the maximum antenna gain allowed to be used with this device.

I'm under the impression that this transceiver is exempt environmental evaluation. Please see CFR 47 part 1.1307 Table 1 which shows that under part 80 'ship earth stations only' require routine environmental evaluation. I've also checked part 2.1091 (c) and find the same exclusion.

2) Upload the page of the User's manual that includes the RF exposure information.

I've uploaded this per your request.

3) Channel 2, 4, 60, and 62 transmissions are not permitted in the US. How are these channels locked out?

Channel 2, 4, 60, and 62 are locked by a software program.

Andy nice to get a chance to talk to you the other evening. Thanks for the information on interpreting the section on environmental evaluation.

Sincerely,

Mario de Aranzeta
Engineer
