Re: Class 2 Permissive Change Request

Applicant: Aperto Networks  
Equipment: 2.6 GHz Part 27 Base Station Transceiver  
FCC ID: PS6BR1000-A1  
Original Grant Date: 12/26/2001

To whom it may concern,

Since the original issue date of this grant, FCC has delete Part 21 from 47CFR and has moved all the technical requirements to Part 27 of the Rules. Aperto intends to continue selling the identical product certified in 2001, the only change being the Rule part reference.

The purpose of this class 2 filing is to change Rule part reference on the grant only. Please refer to the FCC inquiry response, attached, which states class 2 permissive change route is an acceptable means to update the grant information regarding operating Rule Part.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS  
EMC Consultant/Agent for Aperto Networks

**From:** oetech@fccsun27w.fcc.gov  
**Subject:** Response to Inquiry to FCC (Tracking Number 397928)  
**Date:** May 22, 2006 7:12:07 AM PDT  
**To:** tom@tncokenias.org

**Inquiry:**

Aperto Networks obtained a grant for a Part 21 Base Station, FCC ID: PS6BR1000-A1 They would like to continue selling this product for use under Part 27 now that the 2.5 GHz band has been moved to Part 27 and Part 21 no longer exists. There will be no hardware changes, only software settings will be modified to meet the different channelization. Aperto apply would like to apply for a class 2 permissive change just to change the rule part references on the grant. Would this be permitted?

**Response:**

Yes. A Class II PC is acceptable way to add Part 27 to the Certification of the Part 21 Base Station
