Subject: Response to Inquiry to FCC (Tracking Number 397928)

Inquiry:

Aperto Networks obtained a grant for a Part 21 Base Station, FCC ID: PS6BR1000-A1. They would like to continue selling this product for use under Part 27 now that the 2.5 GHz band has been moved to Part 27 and Part 21 no longer exists. There will be no hardware changes, only software settings will be modified to meet the different channelization. Aperto apply would like to apply for a class 2 permissive change just to change the rule part references on the grant. Would this be permitted?

Response:

Yes. A Class II PC is acceptable way to add Part 27 to the Certification of the Part 21 Base Station
