Monday, 09/10/01

Subject: W-Link 2.4 GHz WLAN PC Card Module / FCC ID: PSL-WEN-2012 / 864T1
Ref: SCC Ref No: QTK2001-F003 / TIMCO Reg No: 864T1

Dear Sid and Eric,

Attached find request for interpretation letter sent to Richard Fabina and Ray LaForge last Friday. The below is copy of response from Ray LaForge received today, which agrees with me that the subject device can be TCB granted as WLAN PC Modular Transmitter. As such, please grant the subject device ASAP. Please feel free to contact Richard Fabina and/or Ray LaForge to confirm the above matters.

Best regards,
Richard Mullen / S&CC

If you comply with the modular and limited modular authority policies and your device is not on the exclusion list (and not being installed in a portable device) it can be approved by TCB. If your TCB has concerns you may consider using a different TCB from our list of accredited TCBs. I hope this answers your question.
