
Regulatory Notice

Part Number: 60Y9012

Read first — regulatory information

Read this document before using your computer. This computer complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. Install and use your computer according to the following instructions.

Note: You cannot use the wireless WAN feature and the wireless LAN feature simultaneously. If one of the features has established the connection to the network, the other will be disconnected automatically. To confirm the status of the network connection, check the Network Manager of your computer.

USA — Federal Communications Commission (FCC)

This computer contains the following wireless features and underwent the certification process of FCC CFR 47 Part 2 section 1093, Part 15 Subpart C and E, Part 22 Subpart H, and Part 24 Subpart E under the FCC ID below:

- FCC ID: PU5-BU7LTN
 - Wireless LAN
 - Wireless WAN
 - *Bluetooth*

The FCC ID is shown on the bottom of your computer.

Notes:

- The wireless LAN feature and the *Bluetooth* feature operate exclusively, and do not transmit radio frequencies simultaneously.
- The wireless LAN feature marketed in the U.S.A. do not support or function in the extended channels (12ch, 13ch).

I. Preinstalled integrated wireless features

The wireless LAN feature, the *Bluetooth* feature, and the wireless WAN feature are preinstalled by Lenovo®. If the wireless features require replacement during warranty they must be serviced by a Lenovo authorized servicer.

II. Exposure to Radio Frequency Radiation

The radiated output power of your computer is below the FCC radio frequency exposure limits. Nevertheless, it should be used in such a manner that the potential for human contact is minimized during normal operation of your computer.

CAUTION:

The radiated energy from the antennas conforms to the FCC limit of the SAR (Specific Absorption Rate) requirement regarding 47 CFR Part 2 Section 1093, when the computer operates in the conventional setting. To avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antennas should not be less than 2.5 cm (1 inch). For example, you are requested to be careful when you carry your computer while the wireless feature is turned on.

The transmission antenna of the wireless LAN feature and the *Bluetooth* feature is located at the top center of the LCD cover. The transmission antenna of the wireless WAN feature is located at the top right corner of the LCD cover.

III. Emergency Calls

The wireless WAN feature does not support voice calls, hence their use for essential communication is not possible, including emergency calls regarding the E911 rule.

IV. Simultaneous use of RF transmitters

Your computer is approved for simultaneous use of the integrated wireless WAN and *Bluetooth* transmitters.

Note: The integrated wireless WAN and wireless LAN transmitters do not operate simultaneously.

Make sure of the following conditions when you use any other external wireless option device:

1. When you use any other RF option device, you are requested to confirm that the device conforms to the RF Safety requirement and is approved to use for your computer.
2. You must follow the RF Safety instructions of wireless option devices that are included in the user manual of the RF option device.
3. If wireless options are prohibited to use in conjunction with another transmitters, you must turn off all other wireless features in your computer.

Electronic emissions notices

The following information refers to Lenovo 0251 and Lenovo 2872, machine type 0251 and 2872.

Federal Communications Commission (FCC) Declaration of Conformity

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an authorized dealer or service representative for help.

Lenovo is not responsible for any radio or television interference caused by using other than specified or recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible party:

Lenovo (United States) Incorporated

Wireless related information

Usage environment and your health

Wireless LAN feature, wireless WAN feature, and *Bluetooth* feature emit radio frequency electromagnetic energy like other radio devices. However, the level of energy emitted is far much less than the electromagnetic energy emitted by wireless devices like for example mobile phones.

Due to the fact that wireless LAN feature, wireless WAN feature, and *Bluetooth* feature operate within the guidelines found in radio frequency safety standards and recommendations, Lenovo believes the integrated wireless features are safe for use by consumers. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature.

In some situation or environment, the use of wireless LAN feature, wireless WAN feature, or *Bluetooth* feature may be restricted by the proprietor of the building or responsible representatives of the organization. These situations and areas may for example include:

- Using the integrated wireless features on board of airplanes, in hospitals or near petrol stations, blasting areas (with electro-explosive devices), medical implants or body-worn electronic medical devices, e.g. pace makers.
- In any other environment where the risk of interference to other devices or services is perceived or identified as harmful.

If you are uncertain of the policy that applies on the use of wireless devices in a specific organization (e.g., airport or hospital), you are encouraged to ask for authorization to use wireless LAN feature, wireless WAN feature, or *Bluetooth* feature prior to turning on the computer.

Precautions against electrostatic discharges (ESD) in inserting or removing the SIM card

Do not touch the SIM card connectors. As a precaution, always make sure that your computer is in your hand before you insert or remove the SIM card.
