

Wistron Corporation

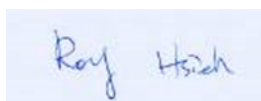

Date: May 12, 2021

We, Wistron Corporation , declare that this EUT

(FCC ID: PU5-TP00114C) doesn't have Ad Hoc Mode function on "non-US/Canada frequencies". In addition, the frequency selection feature is disabled by firmware for devices marketed to the US/Canada. For DTS part of this device, only channels 1~11 will be used in North America/Canada.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,

A handwritten signature in blue ink that reads "Roy Hsieh". The signature is written in a cursive style and is positioned above a horizontal line.
