RE: Wistron Corporation

FCC ID: PU54P1091

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The Manual has omitted any required RF Exposure statements. In this case, the “no co-location” statements would apply. Please correct.
- 2.) The Manual lacks the required “information to user” statement of 15.21. Please review.
- 3.) FCC Rules require the identification of all signal paths, clocks and oscillators in any block diagram. Please submit a corrected Block Diagram indicating the frequency of the “crystal”.
- 4.) Please confirm – yes or no – if this device is capable of transmitting when inserted in the PCMCIA slot of a personal computer.

William H. Graff  
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
