Subject: Letter of Attestation, Assembly Procedures for Wireless LAN antenna connections

Gentlemen:

Please accept this letter as an attestation on behalf of Acer that the manufacturing for notebook computers and installing/connecting the wireless LAN antennas to the matching connectors on the wireless LAN card are clearly stated and provided in the manufacturing and assembly procedures. Acer assembly process documents and clearly identifies the main antenna connector wire (black) and auxiliary antenna wire (gray), and properly identifies their connection to the card. The manufacturing, testing and quality controls that are put in place ensure that Acer products are manufactured to the highest level of quality for the customers.

If you have any further questions or need additional information, please feel free to give me a call at 886-2-8691-3182.

Sincerely,

[Designated Signature]

Tony Wang
