Modular Approval Request Letter

Philips Components
June 27, 2002

Dear Application Examiner,

Philips Components's 802.11b Mini PCI card WLAN and 802.11b Mini PCI Card + v.90/92 WLAN (models PH10766 and PH10754), FCC ID: PUBWCM1001, would like to have your authorization as a modular approval specific to laptop computer with antenna installed around the screen. The requirements of Public Notice DA00-1407 have been met and shown on the following statements.

1. "The modular transmitter must have its own RF shielding." The radio portion of this module has been shielded, please see exhibition External Photo.
2. "The modular transmitter must have buffered modulation/data inputs." The EUT has buffered data inputs; it is integrated in chip ISL 3874.
3. "The modular transmitter must have its own power supply regulation." The chips IF converter (ISL 3783) and RF/IF converter (ISL 3685) which will influence the frequency radiation, have to be 2.85V DC powered. The mini-pci interface provides 3.3VDC, so there are regulators in front of these chips (ADP3330).
4. "The modular transmitter must comply with the antenna requirements of section 15.203 and 15.204(C)." The EUT meets the FCC antenna requirements. The spurious emission, unique antenna connector and photo of antennas are shown in the test report.
5. "The modular transmitter must be tested in a stand-alone configuration" The EUT was tested in a stand-alone configuration via a PCI to mini-PCI extender. Please see section Photographs of Test Configuration in the test report, the EUT was plugged in this extender.

6. "The modular transmitter must be labeled with its own FCC ID number." Please see exhibition Label Sample for the FCC ID of this module. And also in the exhibition Users Manual, there are instructions give to the OEM on how to label the end product.
7. "The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements." The EUT is compliant with all applicable FCC rules. Detail instructions for maintaining compliance are given in the Users Manual.
8. "The modular transmitter must comply with any applicable RF exposure requirements." The EUT is compliant with all applicable RF exposure requirements. RF Exposure is addressed in the RF exposure exhibition.

Please contact me if you have any further questions. Thanks for your attention.

Best Regards,

Joel Wilson
