
ATTESTATION OF COMPLIANCE TESTING

The Xircom, Inc., an Intel company (formally known as Omnipoint Technologies and here after referred to as Xircom, Inc.), Core Engine 1900 MHz GSM Radio Module, FCC ID: PUKGEM3501, has been tested to and found compliant with the requirements of the Federal Communications Commission (FCC) for receipt of a CERTIFICATION grant of equipment authorization. The FCC regulations applicable to this device are 47 CFR Part 2, Subpart J, which details equipment authorization procedures, and 47 CFR Part 24, Subpart E, which sets out the regulations governing broadband personal communications services (PCS) operating in the 1850-1910 and 1930-1990 MHz bands.

All testing was performed using measurement procedures and practices consistent with the aforementioned regulations and with industry standards. Each unit manufactured and marketed will conform to the sample tested. Furthermore, the data reported in this filing is representative of the equipment being produced, within the variations that can be expected due to quantity production and testing on a statistical basis.

To the best of our knowledge, we certify that the facts set forth in this document and the accompanying technical data are true and correct. We further certify that the measurements described in this document were performed under our direction and supervision at the following locations:

Xircom, Inc., an Intel company
(Formerly Omnipoint Technologies, Inc.)
1357 Garden of the Gods Road
Colorado Springs, CO 80907

Criterion Technology (Radiated Spurious Emissions)
1350 Country Road 16
Rollinsville, CO 80474
