TMM 0-V46

HO 1E

8367 ARU 0402

S 246H4 S03

This block contains a large integrated circuit (IC) at the bottom, likely a microcontroller or processor, surrounded by various passive components such as resistors (R180-R195), capacitors (C180-C200), and inductors (L180-L195). It also includes a small component labeled 'F & A' and a component labeled 'U42'.

This block features a prominent component labeled 'S 246H4 S03' and another labeled 'S 273M4 S03'. It is populated with numerous resistors (R160-R175), capacitors (C160-C175), and inductors (L160-L175). Other components include 'U41' and 'U40'.

This block contains several integrated circuits (ICs) and is densely packed with passive components. It includes resistors (R170-R185), capacitors (C170-C185), and inductors (L170-L185). Other components include 'U49' and 'U48'.
