

EXHIBIT Q – Tune Up Procedure

FCC ID# PURRFU7

Tune-up Procedure

Frequency

- 1 Set the center frequency of each transceiver using the Customer-supplied transceiver control interface.

Once the frequency has been set, the power must be set.

Transmit Power

- 2 Install the system management software user interface provided by RadioFrame Networks.
- 3 Set the transmit power of each transceiver to within the allowed limits as specified in the iDEN radioblade specification sheet.
