Subject: Certification for FCC ID: PURSSEROMNICELLH

Gentlemen;
Radioframe Networks, Inc requests a Grant of Certification (Type Acceptance)
for the above mentioned FCC Identifier.

This base station transceiver is designed for use in the GSM 800 MHz cellular telephone system. The transmitter will operate from 869.2 to 893.8 MHz. The receiver circuit supports 824.2 to 848.8 MHz. The base station operates in the 800 MHz broadband Cellular services as per 47 CFR Part 22 subpart H, 22.901 (d). This transceiver will in normal mode operate at a nominal output peak power of 123 mW per channel for GSM Modulation and 120 mW per channel for GPRS Modulation at the antenna connector. The power output is reducible to ~0.0043 watts for both modulation types.

If additional information is needed, please contact me on the below listed number.

Sincerely,

Dean R. Busch
