

GE Lighting

Request for Class II Permissive Change

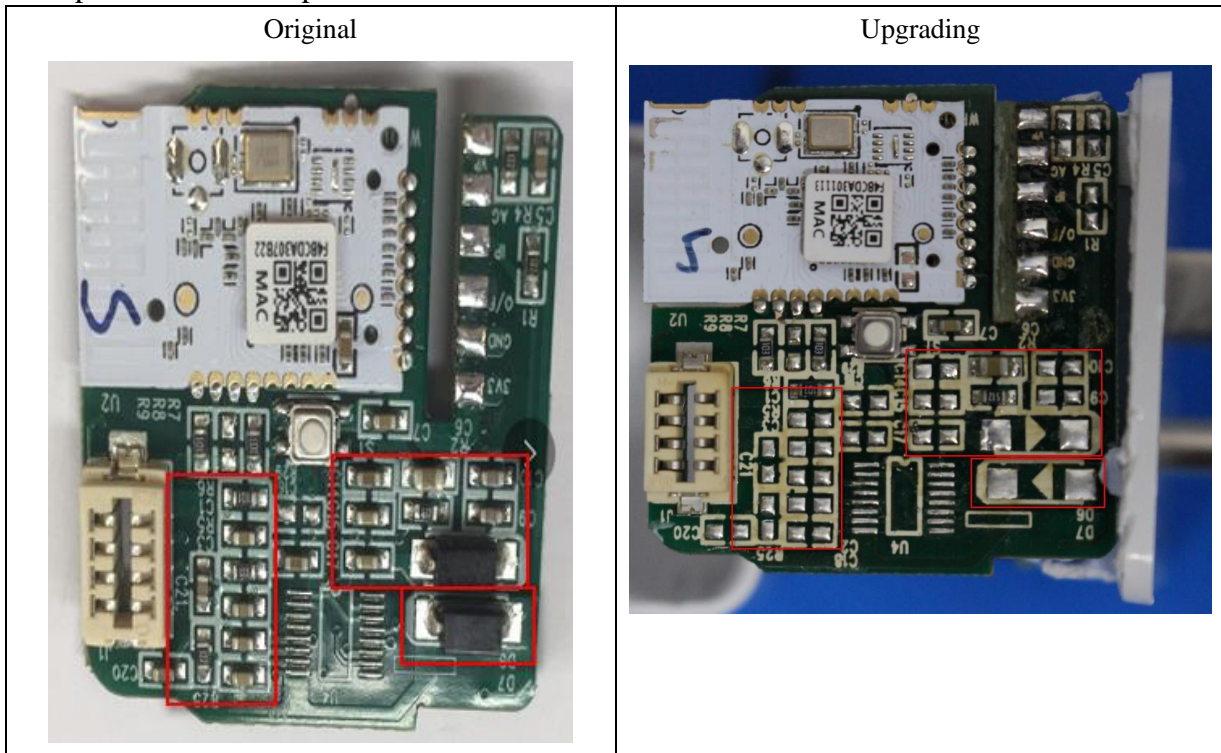

FCC ID: PUU-CSWONBLXWF1

Date: May 31, 2019

TO: Federal Communication Commission

Please be notified that we, the undersigned, GE Lighting declare that the reasons for this Class II permissive change are as below:

The new product only removes the IC with the bit number U4 on the WIFI board and then removes the redundant and useless peripheral related components, which will not effect the function of the product. The original product only removed the IC with bit number U4 and the peripheral related components were not processed and remained on the board.

Thank you.
Sincerely.
