## LED+

One Bulb + One Function

### SPEAKER

### GETTING STARTED GUIDE

See inside for steps

- 1 Screw in the bulb
- 2 Turn on the bulb
- 3 Using your Bluetooth® compatible device, look for the bulb as a discoverable device "GE A21 Speaker Bulb"
- 4 Connect the bulb to play music, podcasts, and more

NOTE: GE LED+ Speaker bulbs will sync automatically with other GE LED+ A21 or BR30 bulbs. Link this bulb with other bulbs to create surround sound experience. Bulbs can be controlled individually by using the remote within close range of a specific bulb. Or, control all synced bulbs by using the remote within close range of the parent bulb. To link additional bulbs, turn on added bulb and it will automatically sync with the parent bulb. Subsequent bulbs should be within 25ft the parent bulb.

### FCC requirements:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
