

## Circuit Description MSD0703

### **MSD0703 Transmitter**

Battery power supply current to PT8A9701 through R2, D1, C6 etc output isobarically filter.

When press the key, oscillations (consist with Q2, C4, Crystal etc.) Start working, and produce 27.145MHz carries wave, at the same time pin 10 of PT8A9701 output coding, via Q1 modulated and then transmit through L2.
