

RE: Hafele America Co.

FCC ID: PW3112

The following is in response to comments made on the above application.

1) Previous attestation letters/test report/internal photographs also included modifications that no longer appear in the new exhibits. Are these old modifications no longer necessary? Please explain and adjust exhibits as necessary.

The modifications originally made were no longer necessary once the manufacturer elected to use ferrites on the associated cables. Thus, these modifications are no longer part of the application.
