Dear Sirs

Re: FCC Submission PW9P4467-T2 – Test Report

This submission includes a copy of Test Report 610823r5 pertaining to PW9P4467-S-T2 as Exhibit 6. We submit that the results of this report are equally valid for this submission as the only difference is the spot temperature measurement option. Only the version with this option was tested as this represents the more complex equipment, which would thus present the worst case from an EMC aspect.

Yours faithfully,

Neil R. Barker C.Eng. MIEE MIEEE MSEE
