Dear Hilton,

**Re: Request for Class 2 Permissive Change for FCC IDs PW9P4467-T2 & PW9P4467-S-T2**

It has proved necessary for us to effect a technical modification to our Argus ® 3 Thermal Imaging Cameras, all versions of Model P4467 including Models P4467/T2 and P4467/S/T2 covered by the above FCC IDs. The change involved the motor for the rotating shutter, which has now been replaced by a new type manufactured by Mabuchi. We have amended the relevant drawings and conducted new EMC tests to the requirements of Parts 15 & 90, which show that there has been no adverse effect on EMC. The radio aspects of the camera are unaffected by this change. This submission includes amendments to Exhibits 5 - Schematics, Exhibit 6 – Technical Reports, Exhibit 8 – User's Manual, and Exhibit 9 – Internal Photos.

We request that Exhibit 5 be kept confidential as per the original submission.

Our purchase order, No. 4500000244, relating to TUV Quotation 106592 includes these submissions.

Yours sincerely,

Neil R. Barker CEng MIEE MIEEE MSEE
