Subject: RE: FCC Equipment Authorization System

Tim,

This is to confirm that for all uplink bands were tested to the +27dBm requirement for input power.
The device goes into saturation and does not exceed the max output power of the device as stated in the report.

Best Regards

Subject: Fwd: FCC Equipment Authorization System

Hoosam,

Please help address this issue.

Note, their concern is likely that section 5.5 of the KDB 935210 was met. For instance, for power it shows:

p) of 7.2.2 for power cites:

p) Increase the signal generator amplitude in 2 dB steps until the maximum input level indicated in 5.4 is reached. Ensure that the EUT maintains compliance with authorized power limits.

Note the procedure states 5.4, but really should reference 5.5

Tim

Date of Original E-mail:01/22/2015

Can you please confirm that the uplink maximum output power test was conducted with a maximum input of 27 dBm as required for direct connect boosters per KDB Pub 935210 D03?

The items indicated above must be submitted before processing can continue on the above referenced application.
Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c).

DO NOT Reply to this email by using the reply button. In order for your response to be processed expeditiously,
you must upload your response via the Internet at www.fcc.gov, E-Filing, OET TCB/Accreditor Electronic Filing,
TCB Login, Submit Correspondence. Also, please note that partial responses increase processing time
and should not be submitted.

Any questions about the content of this correspondence should be directed to the email address listed below the name of the sender.
