

Response to E06-000048-1 and E06-000048-1 IC

FCC

1. The 5.12 dBi figure is the correct number for the 800 MHz band, and 6.12 dBi is correct for the 1900 MHz band. We've updated our installation instructions to preclude any possible misunderstandings by mentioning the more conservative limitation of 6.12 dBi for both bands. For this reason, the minimum safe distance from the antenna has been increased from 14.5 inches to 17 inches. A revised users manual has been uploaded.
2. A revised MPE report has been uploaded.

IC

1. A revised users manual has been uploaded.
2. A revised MPE report has been uploaded.
3. A revised Canadian application form has been uploaded with a new Canadian representative.
