

Response to E03-000107-1

1. The manufacturer's FRN number is 0005-0146-18.
2. The test report has been revised so the MPE calculations correspond to the measured output power.
3. A revised users manual has been uploaded with the correct separation distance.
4. The gains of the antennas are 5.12 dBi and 13 dBi. Two antenna files were uploaded.
5. The frequency 851-866 MHz is receive only. This side is not connected to an antenna and is not a radiator, so it was not listed on the 731 form.
