SUBJECT: Model 801101 Amplifier, FCC ID: PWO824WV, IC: 4726A-824WV

Gentlemen:

Our model 801101 amplifier was previously certified as FCC ID: PWO824WV .

The changes in this amplifier affect only sensing and control circuitry that prevent excessively strong outputs that otherwise could disrupt cell sites located in close proximity. Please see the attached "Operational Description" for further details.

It is our understanding that these changes fall under the Class II Permissive Change process.

Very truly yours,

A handwritten signature in black ink that reads 'Richard M. Kline'.
